

Professional Summary

Experienced Software Engineer with 8+ years in software development, specializing in C# and .NET technologies. Proven expertise in transitioning from .NET 3.5 to .NET Core 8, scalable architecture design, and cloud integration. Adept at leading teams, mentoring future leaders, and delivering innovative solutions. Certified in .NET Microservices and Solution Architecture, with a strong focus on optimizing data management and automating processes for impactful business results.

Core Skills

- **Backend Technologies:** C#, .NET Framework, .NET Core (upto to 10), ASP.NET, Blazor, MVC, Web APIs, RESTful services, Microservices, LINQ, Entity Framework, Dapper, MinimalAPIs, FAST Endpoints, Aspire, mediatr, RepR.
 - **Database Management:** MS SQL, MySQL, PostgreSQL, MongoDB
 - **Cloud & DevOps:** Azure, AWS, Service Bus, RabbitMQ
 - **Project Management Tools:** Jira, ClickUp, Trello, Shortcut, Azure
 - **Version Control:** GitHub, GitLab, Bitbucket
 - **Reporting & Analytics:** Telerik, RDLC
 - **Architectural Patterns:** Repository Pattern, Unit of Work, Multi-Tier Architecture, SOLID, CLEAN
-

Professional Experience

Software Engineer and Lead

Meissasoft — Lahore, Pakistan

September 2024 - Present

- Designed scalable architectures using design patterns, migrating projects from .NET 4.6.2 to .NET Core 7 to improve maintainability.
 - Developed a Promotion Engine for FMCG promotions, significantly enhancing marketing capabilities.
 - Worked on complete migrations of .net legacy booking system (3.5-4.6.2 .net framework) apps to latest microservices and api architecture using C# 14, .net 10.
 - Worked on building complete ERP solution from scratch on latest stack. (.net 10, c# 14, aspire .net, microservices, EF, postgres, n8n, power apps, power automate)
 - Automated data synchronization by building an API, resulting in a 40% reduction in manual data integration efforts.0064
 - **Tech Stack:** .NET Core, APIs, MS SQL, Entity Framework, Repository Pattern, Unit of Work
-

Tech Lead

Raheem Solutions — Lahore, Pakistan

February 2023 - August 2024

- Led the optimization of Kulcha, a social app for finding nearby locations, enhancing data load times and location accuracy by 25%.
 - Coordinated with cross-functional teams to ensure seamless integration and deployment on AWS.
 - **Tech Stack:** Flutter, Express, MongoDB, Next.js, AWS
-

Principal Software Engineer

Raheem Solutions — Lahore, Pakistan

January 2021 - January 2023

- Delivered SalesAssist, a cloud-based sales solution, reducing client costs by 30% compared to existing SND systems.
- Automated report generation using Telerik, cutting down manual report generation time by 50%.
- **Tech Stack:** .NET, Angular, Hangfire, RDLC Reporting

Software Engineer

Techlogix — Lahore, Pakistan

June 2017 - December 2020

- Worked on an in-house sales and distribution product for Nestle.
 - Developed a Web API for Nestle's internal sales tool, automating order synchronization and reducing processing time by 35%.
 - Built an automated claims management portal, shifting from an Excel-based system to a web-based platform.
 - **Tech Stack:** .NET, WPF, MSSQL, Angular, Web API
-

Education

Bachelor of Computer Science

Punjab University College of Information Technology — Lahore, Pakistan

2017

- GPA: 3.5 | Dean's List for four consecutive 4 semesters
 - Teaching Assistant for courses in Databases, System Programming, and Web Development
-

Certifications

- **.NET Microservices Architecture** — Udemy, 2024
 - **Solution Architecture** — Udemy, 2024
-
